# Apple TV

The future of television is here.

Released  
October 26, 2015

TV is a major part of our lives. We gather together around our big screens to watch big shows and big events. Yet somehow, the overall experience of TV has continued to stagnate. Until now. It all starts by recognizing that apps are the future of television. HBO NOW, WatchESPN, Netflix, Hulu, iTunes — apps are quickly becoming how we watch today. So we built a new foundation around this vision — with a new operating system called tvOS, innovative ways to connect with your screen, and a smart use of Siri to search for something to watch. This is the new Apple TV. This is where television is headed.

## Key Features

- A8 chip with 64-bit architecture
- HDMI Port compatibility
- 32GB or 64GB PCIe-based flash storage<sup>1</sup>
- 10/100BASE-T Ethernet Port, IR Receiver, USB-C for service and support, Built-In Power supply
- Apple TV is compatible with high-definition TVs with HDMI
- Built-in 802.11ac Wi-Fi with MIMO<sup>2</sup> and Bluetooth 4.0
- tvOS, Apple's new operating system, exclusively on Apple TV
- Comes with a Siri Remote
  - Rechargeable battery
  - Accelerometer and gyroscope
  - Glass Touch Surface control

## Apple TV with Siri Remote

32 GB: \$149

Part Number: 401967

64 GB: \$199

Part Number: 401968

1st Generation Apple TV still available. See next page for details

<sup>1</sup> 1GB = 1 billion bytes; actual formatted capacity less.

<sup>2</sup> Internet access required. 802.11ac is based on an IEEE draft specification
